Planning Services

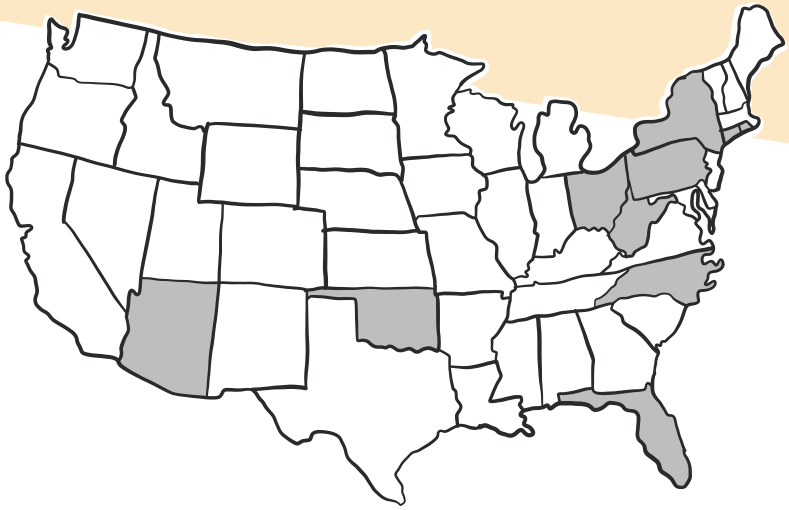

LDG OVERVIEW
at a glance

Larson Design Group (LDG) offers a wide variety of planning and programming services with unique expertise in federal-specific master planning and programming. We work with communities, municipalities, government agencies, and more to provide creative, compliant, and economical solutions to our clients.

LDG's planners, architects, landscape architects, environmental specialists, engineers, and designers support everything from conceptual sketches to full master plans and design guidelines.

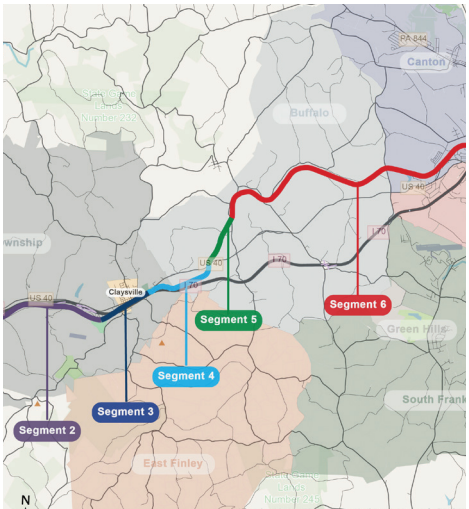

500+ employees

18 offices

8 states

Why LDG?

1

CLIENT SERVICE EXCELLENCE

Our driving value is to serve as trusted advisors to our clients by approaching each relationship with ethics, integrity, and transparency. We listen and take time to understand client needs and are proactive and responsive throughout.

2

INNOVATION

Embracing innovation creates the opportunity for new approaches within our practice areas and the continuous evaluation and improvement of our processes and services.

3

TEAMWORK

Trusting and collaborative relationships across the company help drive knowledge that will be expanded and leveraged for greater results.

4

PERFORMANCE

As employee-owners, we perform to our highest ability by meeting quality expectations with a commitment to responsiveness, safety, and the welfare of all.

5

STEWARDSHIP

Improving the quality of life within our communities is important to us. We commit financial and volunteer support to efforts that generate meaningful outcomes in the communities where our employees live and work.

LDG Services

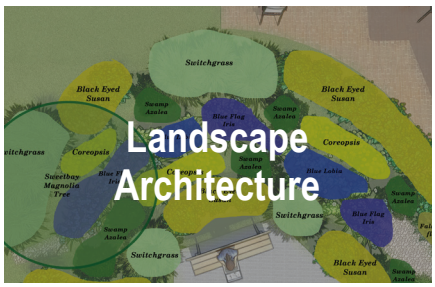

Planning Services

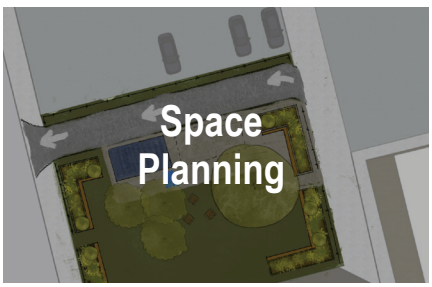

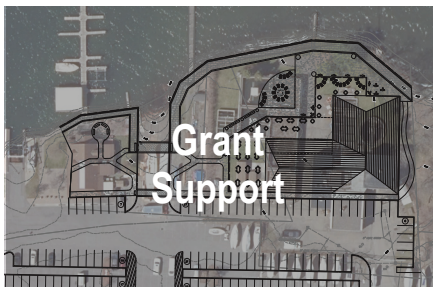

Multidisciplinary Services

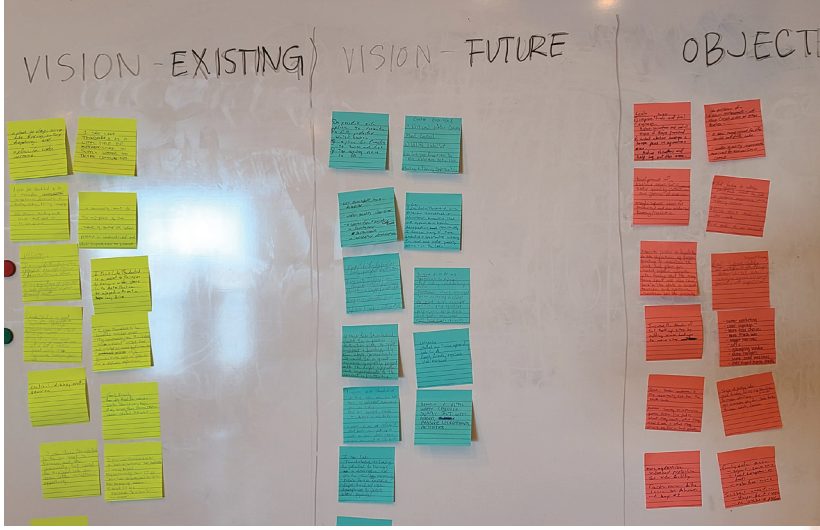

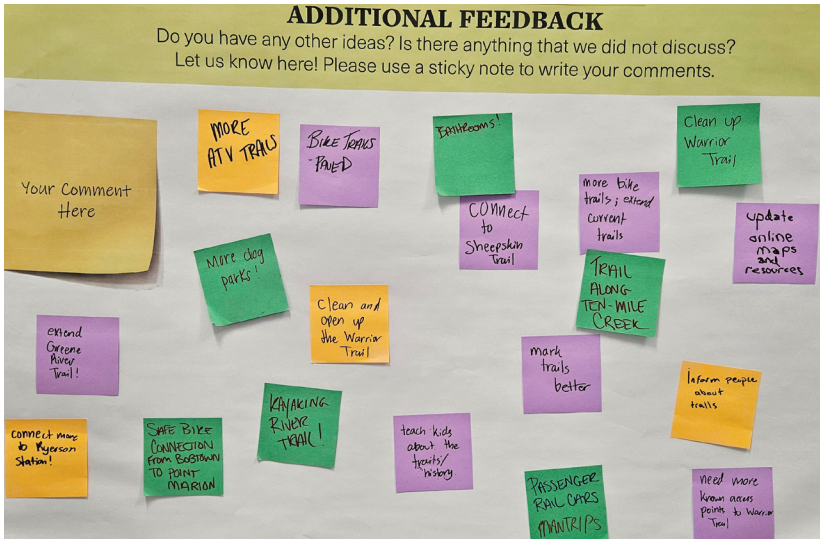

“LDG is the best consulting firm I have ever worked with. I trusted their work and never felt I had to stay involved to ensure it was getting done correctly”

Kyle Lamb,
Greene County Planning Director

Master Planning

LDG's Master Planning services help communities create clear, actionable visions that guide growth, protect resources, and enhance quality of life. Through a collaborative and data-driven process, we integrate land use, parks and recreation, transportation, infrastructure, and economic development into cohesive plans that are both aspirational and implementable. We work closely with stakeholders to define priorities, identify funding opportunities, establish realistic phasing strategies, and develop cost-conscious solutions that align with community goals. With decades of interdisciplinary experience across municipal, county, and regional projects, our team delivers comprehensive master plans that are strategic, technically sound, and positioned for long-term success.

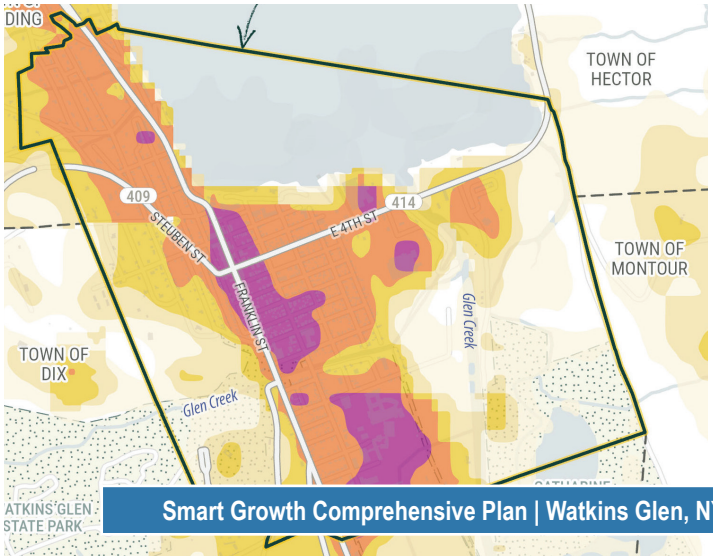

Smart Growth

Site Plans

Grant Preparation

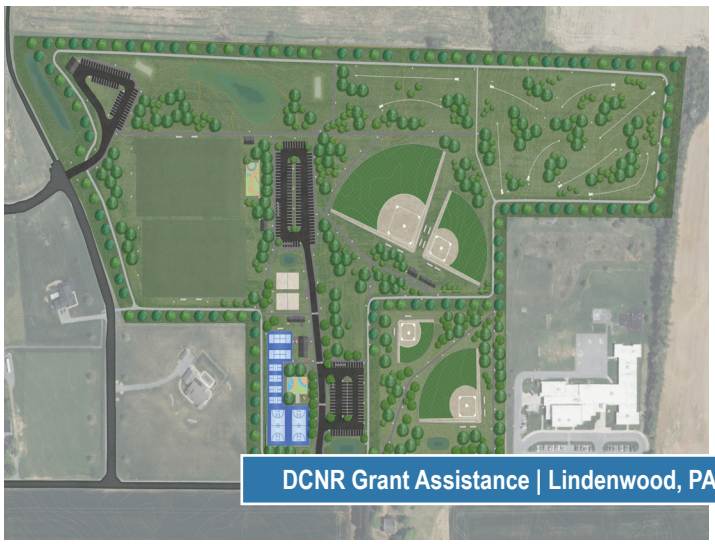

Muncy Resiliency Plan | Muncy Township, PA

Smart Growth Comprehensive Plan | Watkins Glen, NY

Community Development Master Plan | Greensburg, PA

DCNR Grant Assistance | Lindenwood, PA

Village Park Square Master Plan | Franklinville, NY

Strategy to Implementation

Comprehensive. Collaborative. Actionable.

We approach master planning as more than a visioning exercise — it is a roadmap for informed decision-making and long-term success. We establish clear goals, assess existing conditions, and translate community priorities into implementable strategies.

Parks, Trails, and Recreation Planning

Community planning and landscape architecture strengthen communities, promote business growth, improve the quality of life for residents, and provide balanced and enjoyable outdoor spaces for future generations. We help our clients determine their needs, connect with funding sources, control costs, and stay on schedule. Over the past 40 years, we have completed multiple trail, park, and recreation projects that have provided us with a wealth of experience, including the ability to develop a complete, well-designed, and technically sound park system.

Community Park Plan | Athens Township, PA

Building Active Communities

Creating Everyday Destinations

We view parks and recreation planning as a catalyst for building vibrant, active communities. Through stakeholder engagement, needs assessments, and system-wide analysis, we identify gaps, strengthen connections, and prioritize improvements that maximize impact and usability.

Multidisciplinary Services

LDG's planning team drives a truly multidisciplinary approach, bringing together infrastructure, environmental, and mobility experts to deliver cohesive, community-focused solutions. By working hand-in-hand with our water and wastewater engineers, environmental specialists, and transportation designers, planning ensures every project is aligned, efficient, and future-ready. This seamless collaboration allows us to create resilient infrastructure, navigate environmental requirements, and design connected, multimodal networks — all as one unified team. The result is practical, forward-thinking outcomes that move from concept to construction with clarity and purpose.

Water & Wastewater

By integrating water and wastewater engineering with planning insights, LDG delivers infrastructure that's both technically sound and strategically aligned with community goals. The result is coordinated, future-ready solutions.

Environmental

LDG's environmental team works closely with our planners to integrate regulatory strategy, resource protection, and sustainability into every project from day one. Together, we create environmentally responsible solutions that support smart, balanced community growth.

Transportation

LDG integrates transportation design with planning insights to build networks that move people efficiently and safely. This collaboration delivers seamless, people-focused transportation systems.

Creekview Interchange | Cumberland County, PA

Village Wastewater Improvements | Franklinville, NY

Wetland and Stream Restoration

Comprehensive Collaboration

Disciplines That Deliver

We tailor each project to the unique needs, goals, and constraints of the communities we serve, drawing on in-house expertise across disciplines to address challenges as they arise. This depth and flexibility allow our team to seamlessly support projects of any scale or complexity while delivering practical, sustainable outcomes.

SEDA-Council of Governments (SEDA-COG) has had an outstanding experience working with LDG. Their attention to detail, thorough approach, and emphasis on meaningful community engagement have been exemplary. Their expertise and commitment have ensured a planning process that is both comprehensive and inclusive. We highly value our partnership with Larson Design Group and appreciate their dedication to creating impactful, community-driven solutions."

Betsey Kramer,
Program Manager for Community Revitalization
